Dear Medina Community -

As we come to the end of another week of COVID-19, I wanted to share with you the following information: COVID-19 is ever-evolving and City staff continues to work closely with our partners in emergency management and public health officials throughout the State to understand how to best serve your needs, the community and our employees. We are closely monitoring all local public health notifications, as well as, the Center for Disease Control and Prevention (CDC) for updates.

Please note that while City Hall is closed to the public, all our employees are working to keep our government functioning. I appreciate all our employees doing what they can to meet our community's needs while being smart in following health guidelines. Our police officers continue to patrol our streets 24-hours a day to respond to the needs of our residents while observing personal safety.

We'll continue to share information with you and our employees as we move forward together into a future that's hard to predict right now. In the meantime, thank you for your understanding, your patience and for being a part of this great community.

Thank you once again and best wishes,  
Michael Sauerwein  
City Manager
